

## DECLUMPER with cylinder & knives (tooth) for mussels in bulk and nets

**DG1200**

To fit speed and torque for a high performance.

**Quick declumping**

**Electrical net extractor**

**Net picking up**

**Variable speed**

- Cylinder: length 1000 or 1200 mm, motor and gearbox for the net extractor, special « knives » (tooth) to catch the net, tipping bottom for an easy access to the net and easy cleaning from below, declumping with variable speed
- Strongly built in stainless steel: reinforced cylinder, thickness 9 mm Ø 273, cast iron plunger blocks reinforced with Ø 80 shaft, strong welded tube frame
- Direct transmission with reliable and powerful motor with gearbox (very powerful 15 kW)
- Electrical box complies with the EC standards, 380 volts 3phases power supply, operator protection thanks to safety switch on opening tipping bottom.
- Options : staircase with steps in tear drop stainless steel sheets, reversible and sidelong guardrail, hydraulic driven
